

A RATTY2TAILS GAME

FIAT FUN

Print & Play Component Pack

How to make the pieces

Everything here prints on plain A4. Card stock is better, but paper glued to cereal packet works and always has.

- 1** Print single-sided at **100% scale** — do not let the printer "fit to page", or the cards will come out the wrong size.
- 2** Cut along the dashed lines. Event cards come out at standard playing-card size, so they fit sleeves if you have them.
- 3** Print sheet 2 once **per player**. The Price Ladder is the one component everybody needs in front of them all game.
- 4** Print the banknote sheets as many times as your table has patience for. Or raid a Monopoly box — the notes do not need to be pretty, they need to run out slowly.
- 5** For Bitcoin, use **exactly 21** counters of one colour that you own no more of. The physical impossibility of finding a 22nd is the single best teaching aid in the box.
